

Project Management and Technical Services

Capabilities Statement

Project Management Services

HEI has extensive expertise providing technical, program, project management and integration for major U.S. Government projects

Proven Capabilities

- HEI project management experience includes support for large capital and operating projects consistent with DOE Order 413.3A
- HEI expertise includes management and oversight for the installation of specialty equipment for DOE's billion-dollar Spallation Neutron Source (SNS) project

Haselwood Enterprises, Inc. (HEI) provides a complete range of project management services to ensure compliance with Federal requirements, track and assess progress, and facilitate day-to-day project execution. Areas in which HEI provides project management and integration support include:

- DOE O 413.3A/DOE M 413.3-1 Implementation and Compliance
- Independent Verification and Review activities
- Corrective actions management and tracking
- Critical Decision Requests (CDRs) support including
 - Authoring Project Execution Plans and project-specific procedures
 - Facilitating preparation, execution and close out of IPRs/EIRs to support critical decision approvals
- Project-specific procedure preparation
- Briefing and presentation support
- Configuration management
- Conducting options analyses
- Project controls assistance
- Identification and implementation support for cross-site synergies and cost reduction opportunities

Haselwood Enterprises, Inc.
